

Maximum performance!

Our flexible Aluminium rubber cable 07BN4-AF

The innovative 07BN4-AF is a high-performance alternative to the classic H07RN-F cable. The cable impresses with its high flexibility and excellent oil resistance, making it ideal for demanding applications.

Typical applications

- Industry
- Mechanical and plant engineering
- Construction sites
- Event technology
- Agriculture

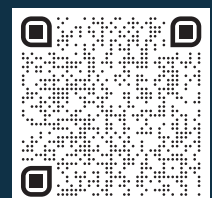

Tested quality and secure connection

- Manufactured in accordance with VDE 0285-525-2-21 (EN 50525-2-21)
- Extensive testing in accordance with IEC 61238-1 and UL 486A-486B
- Easy installation using standard DIN cable lugs

Your benefits at a glance

- High current-carrying capacity thanks to a conductor temperature of 90 °C
- Particularly flexible and oil-resistant
- Reliable and durable
- Suitable for demanding environments (indoor and outdoor use)
